

Hello «First» ,

I hope you are doing well. I'd like to update you on an initiative that we are working on in the Chemical Engineering department and also ask if you wouldn't mind filling out a short survey.

We are proposing to modify the CHE program requirements with the introduction of new courses and several concentrations with the goal of improving and enhancing the BS-degree.

Please take a look at the proposed changes and click on the survey link to give your comments. As a UIC CHE alumnus (or soon-to-be alum), your input is extremely valuable to us.

SURVEY LINK: <https://tinyurl.com/CHEProgramSurvey>

PROPOSED CHANGES TO THE CURRICULUM

1. Addition of new concentrations (Currently we have a Biochemical Engineering Concentration)
 - a. Concentration in Process Simulations
 - b. Concentration in Polymer and Molecular Engineering
 - c. Concentration in Nanotechnology
 - d. Concentration in Energy and Environment
 - e. Concentration in Intellectual Property and Entrepreneurship
2. Introduction of four new courses:
 - a. CHE 2XX: Molecular Systems in Chemical Engineering (Core Course)
 - b. CHE 3XX: Polymer Science in Chemical Engineering (Core Course)
 - c. CHE 4X1: Molecular and Macromolecular Engineering (Elective)
 - d. CHE 4X2: Nanoscale Systems in Chemical Engineering (Elective)

Thank you for your time and effort, it is most appreciated!

Best regards,

Alan Zdunek
