

Teaching and Learning

Sl. No.	Name Facilities	Description	Link
1	Active Learning Systems	Learning Technology Solutions can help you explore and get started using various solutions for student engagement in the classroom. Solutions include UIC-supported tools such as Echo360 and PollEverywhere as well as vendor-supported tools such as iClicker and TurningPoint.	link
2	eLearning Authoring	With an eLearning content authoring tool you can create and package digital content for online learners. Here is a selection of software available to UIC instructors and staff to help create engaging eLearning content.	link
3	Anti Plagiarism	Plagiarism prevention software assists faculty by detecting unoriginal content in student papers and providing a report for review. There are two tools available: SafeAssign can be used by any UIC faculty member via a Blackboard Learn course site, while iThenticate is not integrated with Blackboard and can only be used by faculty and graduate-level students.	link
4	Assessments	Assessing student learning can be done directly on Blackboard or using tools such as Gradescope, a rubric-based grading tool. Also, online proctoring offers students and test-takers the option to take a proctored exam from any location. The process ensures the identity of the test taker and the integrity of the test environment.	link
5	Digital Textbooks	Open educational resources and digital textbooks, or e-books, are common ways to add content to online and blended courses. They offer a computer rendition of physical textbooks with additional features. A digital textbook may be more interactive and engaging. It is often designed with modern tech-savvy learners in mind. To address their learning styles and needs, a digital textbook is usually designed with progress indicators, note-taking, reference tools, advanced searching, videos, animations, or audio resources.	link
6	Equipment Lending	The ACCC provides short-term loans of various equipment to support the academic needs of students and faculty. Information about checkouts and	link

		reservations can be found in Short-Term Lending.	
7	Learning Environments	ACCC provides, maintains, and offers training on the technology available to students, faculty, and staff in over 180 classrooms and over twenty computer labs on campus. Our Learning Technology Solutions support office provides a single point of contact for any learning environment support needs.	link
8	Learning Management System	A learning management system is a web application that allows the creation, administration, tracking, and delivery of digital content via course sites.	link
9	Lecture Capture	With lecture capture, instructors can easily record lectures as videos and allow students to review them after class. Lecture capture systems offer three important benefits: an alternative when students miss class; an opportunity for content review; and content for online course development. Lecture capture enhances and extends existing instructional activities, whether in face-to-face, fully online, or blended learning environments.	link
10	Media Streaming	Streaming is the process of delivering large media files online without waiting for the entire file to download before viewing. While applications or packages typically require that they be downloaded in their entirety before using them, streaming allows you to play the video as the data stream arrives. Streaming media is transmitted by a server and displayed through a media player	link
11	Multimedia Production	ACCC provides multimedia production services for faculty to create multimedia materials for use in their courses, as well as multimedia assistance to students working on academic projects. Multimedia projects include digitizing and conversion, creation and conversion of video, and the creation of fully interactive multimedia objects.	link
12	Surveys	Online surveys are a great way to engage your audience and get feedback from them. You can use online surveys in any number of ways to find out valuable information from your audience to improve your courses, product, and more.	link
