Dear All,

Thanks for participating in the curriculum day. It was great to hear from everyone about the content of our curriculum.

Below are the main action-items and activities to be considered:

1. **Course Flow (To be reviewed by UG-Committee)**
 - a. Advise students to take CS 109 before CHE 205
 - b. Advise Sophomore to take P-Chem-01 in Spring (before CHE 301)
 - c. CHE 201 before 205 and 210
 - d. CHE 321 and 341 in both semesters?
 - e. Look into a course that could be taught in the summer. Maybe CHE 201.
2. **Student Experience (Will be Implemented)**
 - a. Survey students about their experience and address their comments
 - b. Continue Chem-E-Club (Fun + Food + Activity)
 - i. Resume Writing
 - ii. Engage Alumni
 - c. Add a Suggestion Box in the main office
 - d. Advertise tutorial class
 - e. Showcase Chem-E-Car to students at events
3. **Course Content (To be Coordinated with all)**
 - a. Integrate ASPIN in all courses. Michael can give an invited lecture?
 - b. Look into teaching Mathematica, now that MathCad is unavailable.
 - c. Some additional topics that can be covered
 - i. Fermentation
 - ii. Crystallization
 - iii. Solid-Liquid equilibrium
 - iv. Process Simulation
 - v. Data Science
 - d. Build an inventory of course-topics
4. **Educational Tools to Consider (Highly Recommended)**
 - a. Polleverywhere.com to have in-class, real-time survey
 - b. Gradescope.com for grading scanned copies of exams
 - c. Look at content in Learncheme.com

The course flow will have to be reviewed and/or approved by the UG committee and the faculty (before it goes to the college); while the remaining items can be implemented/considered.

We will be sending you the files from the talks soon.

Thanks again for all the effort!

Best,
Vikas
